S. Patent and Trademark Office TOL-326 (Rev. 7-05) Office Ac	tion Summary	Part of Paper No./Mail Date 0922	22005

This is the first office action for application number 10/802,983, Retail Display Support having Reduced Drag and Method, filed on March 17, 2004.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-16, drawn to an apparatus for displaying retail merchandise, classified in class 248, subclass 220.31.
- II. Claims 17-28, drawn to a method for displaying merchandise in a retail environment, classified in class 211, subclass 59.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the apparatus can be used differently such as supporting a book underneath a shelf for referencing.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Claim 1 is generic to a plurality of disclosed patentably distinct species comprising an apparatus for displaying retail merchandise, i.e., Species I - Figs. 2-5; Species II - Figs 7-9a; Species III - Fig. 10; and Species IV - Fig. 11. Applicant is

Application/Control Number: 10/802,983

Art Unit: 3632

required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anita M. King whose telephone number is (571) 272-6817. The examiner can normally be reached on Monday-Friday.

Application/Control Number: 10/802,983
